

MERT EFE ÜNVER

Fullstack AI Developer

+90 505 494 11 46 · mertefeunver09@gmail.com · linkedin.com/in/mertefeunver

PROFESSIONAL SUMMARY

Fullstack AI Developer with hands-on experience building, fine-tuning, and shipping production-grade AI/LLM systems end to end. Independently designs full-stack platforms (React/Next.js + FastAPI), integrates and adapts machine-learning models, and builds the data pipelines that feed them. Comfortable across the full model lifecycle — dataset construction, prompt engineering, fine-tuning, and output evaluation — alongside scalable web and mobile delivery. Dual 1st-place winner in inter-university engineering competitions and a Teknofest finalist, with a strong record of independently building, optimizing, and deploying live products.

TECHNICAL SKILLS

AI / LLM & Fine-Tuning: PyTorch, Hugging Face Transformers, LoRA / PEFT fine-tuning, prompt engineering, RLHF & data annotation, model output evaluation, RAG, Vector DBs, OpenCV, YOLO, MediaPipe

Languages: Python, TypeScript, JavaScript, Java, Dart, SQL

Web & Mobile: React, Next.js, FastAPI, Flutter, Tailwind CSS

Data & Analytics: Web scraping (Selenium, BeautifulSoup), dataset curation & labeling, Power BI, DAX

Tools & Platforms: Git, Supabase, Vercel, FFmpeg, Remotion, Fal AI, Postman, Figma, Playwright, ikas

WORK EXPERIENCE

Pavo Group — Software & AI Development Intern

May 2024 – Jun 2025 · Ankara

- Independently engineered an AI/LLM-integrated task-management tool, embedding language-model features to automate tracking and optimize team workflows.
- Designed comprehensive Power BI reports and dashboards using DAX to deliver actionable insights for executive decision-making.

Kristal Bulut Yazılım — Software Engineering Intern

Aug 2023 – Oct 2023 · Ankara

- Built and deployed a Python web-crawling system (Selenium, BeautifulSoup) scraping product data from 11+ e-commerce platforms into structured JSON — producing clean, labeled datasets ready for downstream ML/AI use.

PROJECTS

Blenz AI — Full-Stack AI Video Editor

blenzai.com

Next.js · FastAPI · OpenCV · FFmpeg · MediaPipe · Remotion · Fal AI · Supabase

- Engineered a full-stack AI video editor; integrated OpenCV, FFmpeg, Google MediaPipe and Librosa for facial recognition and audio-visual processing.
- Integrated third-party generative AI models (Fal AI) into a production rendering pipeline.
- Built a responsive React/Next.js frontend, managed database & authentication via Supabase, and deployed the scalable architecture on Vercel.

LLM Fine-Tuning & Evaluation — [Personal / Freelance — etiketi gerçeğe göre seç]

[tarih aralığı]

Python · Hugging Face Transformers · PEFT / LoRA · PyTorch

- Fine-tuned open-source LLMs (e.g. [Llama / Mistral / model adı]) on custom instruction datasets using LoRA / PEFT; built data-cleaning and formatting pipelines for training data.
- Designed evaluation rubrics and ranked model outputs to improve response quality and factual accuracy. [Somut sonuç ekle: ör. "+X% on Y benchmark / N örneklik dataset"]

Kesin Gelir — Serverless YKS University-Preference Platform

React

- Engineered a serverless frontend that dynamically fetches, processes, and renders large external datasets without dedicated backend infrastructure.

EDUCATION

M.S. in Computer Engineering (Thesis) — Gazi University, Ankara

Jan 2026 – Present

B.S. in Computer Engineering (Full Scholarship) — TED University, Ankara

Sep 2020 – Jul 2025

- GPA: 3.23 / 4.0 · Secondary Field: Applied Data Analytics

HONORS & AWARDS

- Dual 1st Place — inter-university engineering competitions
- Teknofest Finalist
